

JACOB COOK

Sacramento, CA | (916) 314-5358 | jacobcookofficial@gmail.com

[LinkedIn: jcook-dev](#) | [GitHub: jacobdcook](#) | jacobdcook.com

CompTIA Security+ certified CS graduate pursuing SOC Analyst and IT Support roles. Hands-on experience with SIEM deployment, log analysis, phishing triage, and incident documentation through home labs and WGU coursework.

EDUCATION & CERTIFICATIONS

WGU: MS, Cybersecurity (In Progress) | CSUS: BS, Computer Science (2024) GPA 3.50

CompTIA Security+ Certified (SY0-701) — Score: 805/900 — Jan 2026

TECHNICAL SKILLS

SOC / Blue Team: SIEM (Wazuh), Log Analysis, Alert Triage, Incident Documentation, Phishing Analysis, Threat Detection, Playbook Automation

Systems & IT: Windows Endpoints, Linux (Ubuntu/CentOS), Azure AD, Networking Fundamentals, Wireshark, VirtualBox, System Hardening, Root Cause Analysis

Development & Automation: Python, Bash Scripting, SQL, Git, FastAPI, React, Ticketing/Documentation Tools

TECHNICAL PROJECTS

Blue Team SOC Monitoring Lab (Wazuh SIEM) 2026

- Deployed full Wazuh stack (Manager, Indexer, Dashboard) to monitor endpoints for brute-force and malware indicators
- Wrote Python scripts to simulate attack scenarios and tuned detection rules to reduce false positive alerts
- Analyzed auth and security logs to distinguish real threats from noise and documented incident timelines

Phishing Analysis Lab 2026

- Performed hands-on phishing email analysis including header inspection, link extraction, and VirusTotal lookups
- Created Tier 1-style triage reports documenting IOCs and escalation recommendations for incident response

SOAR-lite – Incident Response Orchestrator 2026

- Built automated playbooks triggered by SIEM alerts to streamline SOC incident response workflows
- Integrated alert enrichment and notification pipelines reducing manual triage steps for common alert types

Industry-Sponsored AI Platform (G3-GPT) — Team of 6 2024

- Engineered role-based access control and Azure SSO enforcing strict data privacy for corporate stakeholders
- Delivered production-ready enterprise platform collaborating across a six-person engineering team

PROFESSIONAL EXPERIENCE

Target Distribution Center 2019 – 2025

Warehouse Operations – Engineering & Facilities Support

- Monitored industrial control systems and sensors for operational incidents ensuring high availability
- Performed root cause analysis on system failures and documented resolutions for compliance tracking
- Administered hardware configuration changes following enterprise change management procedures
- Coordinated incident response with engineering teams to minimize system downtime across shifts

ADDITIONAL

- Building continuous hands-on experience through home labs, CTF challenges, and WGU cybersecurity coursework
- Enjoys camping, mountain biking, and hiking — portfolio and project details at jacobdcook.com
