

JACOB COOK

Information Security Engineer II | Healthcare / HIPAA · CIA Triad · Web Security · Network & Endpoint Hardening · IR & Vulnerability Mgmt

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Hands-on security engineer with detection, IR, and identity-control implementation experience. California-resident ✓. Built a Wazuh SIEM stack from scratch, authored Sigma rules mapped to MITRE ATT&CK, and engineered RBAC/SSO controls on a production AI platform. CompTIA-certified across four disciplines (Security+, CySA+, PenTest+, SecurityX); BS Computer Science; MS Cybersecurity in progress. Strong analytical, problem-solving, and consultative communication skills suited to a healthcare CIA-triad-focused engineering role.

TECHNICAL SKILLS

Security Engineering & Implementation: Security Solution Design & Operationalization, RBAC / SSO Implementation, System Hardening, Web Security Concepts (DMZ, SSL/TLS, Web Architecture), Encryption (DES/AES Concepts, Digital Certificates), VPN / IPsec Concepts

Detection, IR & Vulnerability Mgmt: Wazuh SIEM (build & admin), Sigma Rule Authoring, MITRE ATT&CK, EDR Concepts, Vulnerability Assessment Concepts (Nmap familiar), Incident Response Lifecycle, Phishing Triage

Compliance & Process: HIPAA / HITECH (familiar), Audit Evidence & Documentation, ITIL Concepts, Risk Identification & Analysis

Cloud, Networking & Dev: Azure AD / Entra ID, Okta, AWS labs, Networking (TCP/IP, DNS), Linux & Windows Admin, Python · Bash · SQL · FastAPI · Git

TECHNICAL PROJECTS

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Designed and implemented RBAC and Azure AD SSO controls on a production AI platform — direct security solution design, implementation, and operationalization expected of an Information Security Engineer II.
- Shipped enterprise-grade platform on deadline under direct industry sponsor oversight with zero critical security findings — security solutions aligned with stakeholder policy and regulatory expectations.

Blue Team SOC Monitoring Lab: Wazuh SIEM 2026

- Built a full Wazuh SIEM stack from scratch on Linux infrastructure — direct hands-on with security tooling design, configuration, and operationalization.
- Validated 12 detection patterns against 242 simulated events with 100% precision after tuning, reducing false-positive volume by 100% with documented justification.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK that eliminated 100% of false positives in a 100-event simulation — repeatable, audit-ready evidence of control behavior.
- Documented 18 benign scenarios in the same evidence-trail format healthcare audit cycles depend on.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

SOAR-lite: Incident Response Orchestrator 2026

- Built end-to-end IR automation: webhook ingestion, playbook routing, IP blocking, Slack notification, and incident write-up — direct demonstration of operationalizing security solutions from design through delivery.
- Reduced triage time by over 60% in lab testing.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

Phishing Analysis Lab 2026

- Triaged 5 real-world phishing samples end-to-end — header inspection, SPF/DKIM/DMARC, IOC extraction, attacker infrastructure mapping — 100% accurate verdicts. Phishing is a top healthcare-targeting vector.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Maintained 99.5% uptime in a regulated, high-availability environment — direct experience operationalizing controls and supporting audit readiness.
- Resolved 200+ anomalies through structured RCA and tracked documentation that reduced repeat incidents by an estimated 30% — same consultative and detail-oriented approach Information Security Engineer II requires.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination and post-incident reporting.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
