

JACOB COOK

Information Security Risk Analyst | NIST 800-30 / 800-53 · Risk Register · Third-Party Risk · Awareness Training · Phishing Simulations

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Risk-aware security professional with framework knowledge across NIST 800-30, NIST 800-53, ISO 27001, SOC 2, and PCI from CompTIA Security+, CySA+, PenTest+, and SecurityX certifications and an MS Cybersecurity in progress. Hands-on labs demonstrate the structured assessment-and-document discipline risk analysis depends on: documented control behavior, false-positive scenarios with ownership, and KPI-style reporting. Strong written communication for translating technical risk into business-impact language for non-technical stakeholders.

TECHNICAL SKILLS

Risk & GRC: NIST 800-30 (Risk), NIST 800-53, ISO 27001, SOC 2, PCI DSS, FedRAMP/GovRAMP (familiar), Risk Register Maintenance, Treatment Plans & Ownership Tracking, KPI/KRI Reporting, Third-Party Risk Assessment, Awareness Training & Phishing Simulation

Security Operations: SIEM (Wazuh), Sigma Rule Authoring, MITRE ATT&CK, Detection Tuning, Phishing Triage, Continuous Monitoring

Cloud & Identity: Azure AD / Entra ID, Okta, AWS labs, GCP (familiar), SSO / RBAC, Terraform, SaaS Risk Considerations

Development: Python, Bash, SQL, FastAPI, Git

TECHNICAL PROJECTS

Stryker / Intune Detection Pack: Detection-as-Code

2026

- Authored 6 Sigma-format detection rules with documented likelihood, impact, and ownership rationale per rule — the same risk-translation discipline NIST 800-30 risk assessments require.
- Documented 18 benign false-positive scenarios as audit-ready evidence with treatment guidance, mirroring the risk-register pattern of "identified, owned, treated, monitored."
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

Phishing Analysis Lab

2026

- Triageed 5 real-world phishing samples end-to-end with documented IOCs, confidence assessments, and escalation decisions in the same evidence-trail format awareness-training content draws from.
- Built a triage write-up format directly applicable to phishing-simulation reporting and role-based training material.

Blue Team SOC Monitoring Lab: Wazuh SIEM

2026

- Built a Wazuh SIEM stack from scratch and validated 12 detections against 242 simulated events with 100% precision after tuning, producing the kind of metric-driven control evidence ISO 27001 and SOC 2 audits require.
- Reduced false-positive volume by 100% with documented justification per suppression — direct continuous-monitoring evidence supporting an InfoSec risk register.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

SOAR-lite: Incident Response Orchestrator

2026

- Codified response runbooks into automated playbooks with documented routing, escalation, and write-up — repeatable, auditable workflow that supports compliance evidence collection.
- Reduced triage time by over 60% in lab testing while preserving end-to-end documentation trail.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6)

2024

- Engineered RBAC and Azure AD SSO controls with documented data-privacy boundaries — direct exposure to enterprise risk identification, treatment, and stakeholder communication.
- Shipped enterprise-grade platform on deadline under direct industry sponsor oversight with zero critical security findings at delivery.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response

2019 - 2025

- Maintained 99.5% uptime by tracking continuous-monitoring telemetry — the same continuous-control monitoring rigor a maturing risk program depends on.
- Resolved 200+ anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% — the corrective-action and risk-treatment discipline expected of a Risk Analyst.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination and post-incident reporting that mirrors KPI/KRI communication for governance committees.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
