

JACOB COOK

Detection & Response Engineer | AI Cybersecurity Content Evaluation | Detection Engineering · Pen Test · IR · Technical Writing

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Hands-on cybersecurity practitioner spanning detection engineering, pen testing fundamentals, incident response, and phishing/IOC analysis. Strong technical writing and code-fluency well-suited to evaluating AI-generated security content for real-world accuracy and validity. CompTIA-certified across four disciplines including Security+, CySA+, PenTest+, and SecurityX. Comfortable navigating and patching codebases (Python/Bash/FastAPI). BS Computer Science; MS Cybersecurity in progress.

TECHNICAL SKILLS

Cybersecurity Breadth: Detection Engineering, Threat Hunting, Incident Response, Phishing Triage, Vulnerability Analysis, Pen Testing Concepts (PenTest+ certified), MITRE ATT&CK, Sigma Rule Authoring, OWASP, IOC & Threat Intel Analysis

Tooling & SIEM: Wazuh SIEM (build & admin), Microsoft Sentinel (familiar), KQL/SPL (familiar), Wireshark, VirusTotal, OSINT, AI-Assisted Investigation

Code & Codebase Fluency: Python, Bash, SQL, FastAPI, React, Git, Code Review & Patching, Technical Writing for Security Content

Cloud & Identity: Azure AD / Entra ID, Okta, AWS labs, SSO / RBAC, Terraform

TECHNICAL PROJECTS

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK and wrote detailed technical explanations of each rule's intent, baseline logic, and evasion considerations — exactly the kind of expert-written security content AI training feedback depends on.
- Eliminated 100% of false positives in a 100-event simulation (80 benign suppressed, 20 malicious caught), validating detection content quality the way an evaluator validates AI security outputs.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

SOAR-lite: Incident Response Orchestrator (Python / FastAPI) 2026

- Built end-to-end IR automation in Python and FastAPI — direct demonstration of comfort navigating and patching a codebase plus designing security-relevant code.
- Reduced triage time by over 60% in lab testing.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py). Tests run against the real FastAPI app, not mocks.

Blue Team SOC Monitoring Lab: Wazuh SIEM 2026

- Built a Wazuh SIEM stack from scratch and validated 12 detection patterns against 242 simulated events with 100% precision after tuning — direct hands-on experience evaluating whether detection logic actually holds up against real attack patterns.
- Reduced false-positive volume by 100% by tuning out 79 benign-only matches with documented rationale.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

Phishing Analysis Lab 2026

- Triageed 5 real-world phishing samples end-to-end: header inspection, SPF/DKIM/DMARC validation, URL defanging, VirusTotal enrichment, IOC extraction, and attacker infrastructure mapping — 100% accurate verdicts.
- Wrote production-style triage reports with clear technical explanations, exactly the format AI security content evaluation depends on.

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Direct AI-platform experience: secured a production AI tool by engineering RBAC and Azure AD SSO, with zero critical security findings at delivery — first-hand exposure to AI-system threat surface.
- Shipped enterprise-grade platform on deadline under direct industry sponsor oversight.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Six years of structured root cause analysis and tracked documentation — the same fact-checking and write-clear-explanations discipline AI evaluation work depends on.
- Resolved 200+ anomalies, reducing repeat incidents by an estimated 30% through clear post-incident reporting.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination and stakeholder communication.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
