

JACOB COOK

DevSecOps Engineer | Cloud-Native Security · CI/CD Pipelines · Terraform · Detection-as-Code · FedRAMP-Aligned

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com

linkedin.com/in/jcook-dev · github.com/jacobdcook · jacobdcook.com

Security-focused engineer combining hands-on detection-as-code experience with cloud, IaC, and CI/CD fundamentals. Built a Wazuh SIEM stack on Linux from scratch, authored Sigma rules version-controlled in Git, and engineered Python/FastAPI automation that scales response. CompTIA-certified across four disciplines (Security+, CySA+, PenTest+, SecurityX) with framework knowledge of NIST 800-53 and FedRAMP. US citizen. BS Computer Science; MS Cybersecurity in progress. Strong fit for embedding security into infrastructure, pipelines, and runtime systems.

TECHNICAL SKILLS

DevSecOps & Pipelines: Detection-as-Code (Sigma, Git-tracked, pytest-validated), CI/CD Concepts (GitHub Actions familiar), IaC (Terraform), Continuous Monitoring & Compliance Reporting, Security Scanning Concepts (SAST/DAST/Dependency)

Cloud-Native & Containers: Azure / Entra ID, AWS labs, GCP (familiar), Linux Hardening, Docker (basics), Kubernetes (concepts), Multi-Cloud Configuration Awareness, FedRAMP / NIST 800-53 (familiar)

Security Operations: Wazuh SIEM (build & admin), Sigma Rule Authoring, MITRE ATT&CK, IR Lifecycle, Vulnerability Assessment Concepts, OWASP, Phishing Triage

Development: Python, Bash, SQL, FastAPI, React, Git, Webhook-Driven Automation

TECHNICAL PROJECTS

SOAR-lite: Incident Response Orchestrator (Python / FastAPI) 2026

- Built end-to-end alert automation in Python and FastAPI: webhook ingestion, playbook routing, IP blocking, Slack notification, and incident write-up — direct work integrating security signals into automated workflows.
- Eliminated four manual triage steps and reduced triage time by over 60% in lab testing.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py). Tests run against real FastAPI app, not mocks.

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format detection rules under Detection-as-Code workflow: Git-tracked, version-controlled, pytest-validated — the same shift-left and guardrail discipline DevSecOps applies to security controls.
- Eliminated 100% of false positives in a 100-event simulation using documented baseline-lookup logic.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

Blue Team SOC Monitoring Lab: Wazuh SIEM (End-to-End Linux Build) 2026

- Built a full Wazuh SIEM stack on Linux from scratch — direct hands-on with cloud-native-style security tooling deployment, hardening, and continuous-monitoring configuration.
- Reduced false-positive volume by 100% by tuning out 79 benign-only matches without dropping a single true positive.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Engineered RBAC and Azure AD SSO controls on a production AI platform — direct cloud security and IAM implementation work in a Git-based development workflow.
- Shipped enterprise-grade platform on deadline under direct industry sponsor oversight with zero critical security findings at delivery.

Phishing Analysis Lab 2026

- Triaged 5 real-world phishing samples end-to-end with documented IOCs and attacker infrastructure mapping — 100% accurate verdicts against ground truth.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Maintained 99.5% uptime by monitoring environments, logs, and alerts on rotating shifts — direct continuous-monitoring discipline transferable to runtime security operations.
- Resolved 200+ anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% and supported audit readiness.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination, escalation, and post-incident reporting.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress) Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
