

JACOB COOK

Automation Architect | Enterprise Integration · RPA · AI-Augmented Workflow | Python · FastAPI · Webhooks · APIs

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com

[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Pragmatic, hands-on automation builder. Engineered Python/FastAPI orchestration that ingests webhooks, routes playbooks, calls REST APIs, and writes case documentation end-to-end — eliminating four manual steps and cutting workflow time over 60%. Direct exposure to AI platform delivery (G3-GPT) and AI-augmented investigation tooling. Strong cross-functional collaboration record across six years of operations work. CompTIA-certified across four disciplines (Security+, CySA+, PenTest+, SecurityX); BS Computer Science; MS Cybersecurity in progress.

TECHNICAL SKILLS

Automation & Integration: Python (FastAPI, REST APIs), Webhook-Driven Workflows, Playbook Orchestration, Browser/UI Automation (Playwright concepts), Process Automation, AI-Augmented Workflow Design, Git-Based Iteration
Platforms & Reliability: Linux (Ubuntu / CentOS) Build & Admin, Continuous Monitoring, Incident Response, Cross-Functional Stakeholder Coordination, Managed Services Vendor Engagement Discipline
Data, Cloud & Identity: SQL, Azure / Entra ID, AWS labs, Terraform, SSO / RBAC
Security & Detection: Wazuh SIEM (build & admin), Sigma Rule Authoring, MITRE ATT&CK, Phishing Triage, IOC Analysis

TECHNICAL PROJECTS

SOAR-lite: Workflow Orchestration Platform (Python / FastAPI) 2026

- Built end-to-end workflow automation: webhook ingestion, decision-based routing, REST-API integrations (IP blocking, Slack notification), and structured documentation — directly analogous to enterprise integration and RPA orchestration.
- Eliminated four manual process steps and reduced cycle time by over 60% in lab testing.
- Verification: 10 passing pytest cases (tests/test_orchestrator.py). Tests run against the real FastAPI app, not mocks — production-mindset reliability.

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Direct enterprise AI delivery experience: secured a production AI platform with RBAC and Azure AD SSO, enabling executive-level adoption with zero critical findings at delivery.
- Partnered with corporate sponsors as primary stakeholder during delivery — direct experience working closely with business stakeholders to ship reliable, scalable AI solutions.

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format rules with Git-tracked, version-controlled, pytest-validated workflow — the same automation-and-reliability discipline enterprise integration platforms depend on.
- Eliminated 100% of false positives in a 100-event simulation using documented baseline-lookup logic.
- Verification: 43 passing pytest cases (tests/test_rules.py).

Blue Team SOC Monitoring Lab: Wazuh SIEM 2026

- Built a Wazuh SIEM stack from scratch on Linux infrastructure — direct hands-on with platform reliability, evolution, and delivery work expected of an automation architect.
- Validated 12 detection patterns against 242 simulated events with 100% precision after tuning.
- Verification: 19 passing pytest cases (tests/test_detection_accuracy.py).

Phishing Analysis Lab 2026

- Triageed 5 phishing samples end-to-end with structured triage reports and IOC documentation — 100% accurate verdicts.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Six years coordinating cross-team response across operations, engineering, and management — direct experience driving reliability and partnering with stakeholders to deliver scalable solutions.
- Resolved 200+ system anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% — same pragmatic problem-solving and process-improvement discipline an automation architect applies.
- Reduced mean time to recovery by an estimated 20% via clear, timely status updates and post-incident reporting for technical and non-technical audiences.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress) Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
