

JACOB COOK

SOC Analyst (Tier 1) | 24/7 Triage Specialist | SIEM · MITRE ATT&CK · Sigma · Network & Endpoint Security · Customer Communication

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Detection-focused SOC candidate with hands-on Wazuh SIEM build, Sigma rule authoring, and structured triage documentation. Six years of 24/7 rotating-shift operations experience translates directly into the always-on triage cadence a Tier 1 SOC role demands. CompTIA Security+, CySA+, PenTest+, and SecurityX certified; US citizen. Strong written communication for incident documentation and customer-facing updates. BS Computer Science; MS Cybersecurity in progress.

TECHNICAL SKILLS

SOC & Triage: SIEM Alert Triage, Tier 1 Resolution, Escalation to Tier 2, MITRE ATT&CK, Investigation Documentation, Phishing Triage, IOC Analysis, SLA-Driven Workflow, 24/7 Shift Operations

Tooling & Networking: Wazuh SIEM (build & admin), Sigma Rule Authoring, Microsoft Sentinel (familiar), KQL/SPL (familiar), IDS/IPS Concepts, Endpoint Protection Concepts, Network Fundamentals (OSI, TCP/IP, DNS, HTTPS, Firewall Logs), SOAR (familiar)

Cloud & Identity: Azure AD / Entra ID, Okta, AWS labs, Active Directory & Group Policy (concepts), PowerShell (familiar), SSO / RBAC, Terraform

Development & Communication: Python, Bash, SQL, FastAPI, Git, Customer-Facing Technical Writing

TECHNICAL PROJECTS

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK and triaged 100 simulated events through structured Tier 1 workflow — 80 benign suppressed, 20 malicious correctly escalated, with 100% accuracy.
- Documented 18 benign false-positive scenarios so Tier 1 analysts can triage confidently without escalating known-good activity.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

Blue Team SOC Monitoring Lab: Wazuh SIEM 2026

- Built a Wazuh SIEM stack from scratch and validated 12 detection patterns against 242 simulated auth-style events with 100% precision after tuning — direct hands-on with SOC tooling under realistic alert volume.
- Reduced false-positive volume by 100% by tuning out 79 benign-only matches without dropping a single true positive — the same noise-reduction discipline Tier 1 teams continuously apply.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

Phishing Analysis Lab 2026

- Triaged 5 real-world phishing samples end-to-end: header inspection, SPF/DKIM/DMARC validation, URL defanging, VirusTotal enrichment, IOC extraction — 100% accurate verdicts against ground truth.
- Delivered structured advisory write-ups in customer-readable format suitable for SOC publication.

SOAR-lite: Incident Response Orchestrator 2026

- Eliminated four manual triage steps via Python/FastAPI playbook automation, reducing triage time by over 60% in lab testing — the same configuration of security monitoring tools and SOAR-style automation a Tier 1 supports.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Engineered RBAC and Azure AD SSO controls on a production AI platform with zero critical security findings at delivery — direct cloud identity work transferable to AD/Group-Policy-aware SOC investigations.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Six years of 24/7 rotating-shift work — direct experience operating effectively at unsociable hours and weekends, the same shift discipline a Tier 1 SOC role requires.
- Resolved 200+ anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% — same SLA-and-evidence discipline Tier 1 ticket workflow depends on.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination and clear post-incident reporting.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
