

JACOB COOK

Security Analyst II | Third-Party / Vendor Risk Management | NIST CSF · ISO 27001 · SOC 2 · AI/ML Risk Review

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Security analyst with framework knowledge across NIST CSF, NIST 800-53, ISO 27001, and SOC 2 from CompTIA Security+, CySA+, PenTest+, and SecurityX certifications and an MS Cybersecurity in progress. Hands-on labs demonstrate the structured-assessment discipline TPRM demands: documented control behavior, false-positive scenarios, evidence repositories, and clear written verdicts. Strong analytical and writing skills with experience evaluating risk across data handling, identity, and integrations. Comfortable with AI-assisted tooling for assessment efficiency and consistency.

TECHNICAL SKILLS

GRC & Vendor Risk: NIST CSF, NIST 800-53, ISO 27001, SOC 2, SOC Report Review, Risk & Gap Analysis, Control Mapping, Vendor Documentation Review, Audit Evidence, AI/ML Risk & Data Governance

Security Operations: SIEM (Wazuh), Sigma Rule Authoring, MITRE ATT&CK, Detection Tuning, Incident Response Documentation, Continuous Monitoring

Cloud & Identity: Azure AD / Entra ID, Okta, AWS labs, SSO / RBAC, Terraform

Development: Python, Bash, SQL, FastAPI, Git

TECHNICAL PROJECTS

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK with documented rationale, scope, and false-positive scenarios — the same structured-assessment write-up format vendor risk reviews require.
- Eliminated 100% of false positives in a 100-event simulation (80 benign suppressed, 20 malicious caught) using documented baseline-lookup logic.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py), reproducible against synthetic data.

Blue Team SOC Monitoring Lab: Wazuh SIEM 2026

- Built a full Wazuh SIEM stack and validated 12 detection patterns against 242 simulated events with 100% precision after tuning, documenting control behavior and remediation rationale at each step.
- Reduced false-positive volume by 100% by tuning out 79 benign-only matches with documented justification — the same evidence-trail discipline TPRM assessments depend on.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

SOAR-lite: Incident Response Orchestrator 2026

- Eliminated four manual triage steps by codifying response into automated playbooks with documented routing, escalation, and write-up at each stage — the same repeatable, measurable workflow risk programs scale on.
- Reduced triage time by over 60% in lab testing while preserving full documentation trail per incident.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

Phishing Analysis Lab 2026

- Triageed 5 real-world phishing samples end-to-end with documented IOCs, confidence assessments, and escalation decisions in the same risk-write-up format vendor incident communications require.
- Achieved 100% accurate threat classification against known IOC ground truth.

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Engineered RBAC and Azure AD SSO controls with documented data-privacy boundaries — direct exposure to AI/ML platform risks, data handling assumptions, and integration security review.
- Shipped enterprise-grade platform on deadline under direct industry sponsor oversight with zero critical security findings at delivery.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Maintained 99.5% system uptime by triaging telemetry alerts on rotating shifts — the same continuous-monitoring rigor vendor security posture tracking depends on.
- Resolved 200+ anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% and supported audit readiness.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination, escalation, and post-incident reporting for technical and non-technical stakeholders.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
