

JACOB COOK

Information Security Analyst II | Healthcare / HIPAA · ePHI Protection · SIEM · EDR · Vulnerability Mgmt · IR & Documentation

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Detection-focused security analyst with hands-on experience monitoring SIEM events, authoring Sigma rules mapped to MITRE ATT&CK, and producing structured incident documentation. Six years operating in a regulated, high-availability environment translates directly into the patient-care-focused, audit-ready discipline healthcare security demands. CompTIA-certified across four disciplines (Security+, CySA+, PenTest+, SecurityX); BS Computer Science; MS Cybersecurity in progress. Comfortable with HIPAA Security Rule concepts and continuous-monitoring evidence trails.

TECHNICAL SKILLS

Healthcare Security & Compliance: HIPAA Security Rule (familiar), HITECH (familiar), ePHI Protection Concepts, Clinical-Adjacent System Awareness, Regulated-Environment Discipline, Audit Evidence & Documentation
Detection, IR & SIEM: Wazuh SIEM (build & admin), Sigma Rule Authoring, MITRE ATT&CK, EDR Concepts, IOC Analysis, Incident Containment / Recovery / RCA, Phishing Triage, Microsoft Sentinel (familiar), KQL/SPL (familiar)
Identity, Networking & Vuln Mgmt: Azure AD / Entra ID, Active Directory, Windows & Linux Admin, Networking (TCP/IP, DNS, Firewalls), Vulnerability Assessment Concepts
Scripting & Cloud: Python, PowerShell (familiar), Bash, SQL, FastAPI, Git, Azure / AWS labs, Terraform

TECHNICAL PROJECTS

Stryker / Intune Detection Pack: Detection-as-Code 2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK with enrichment logic that eliminated 100% of false positives in a 100-event simulation — direct monitoring/detection mechanism work transferable to ePHI-protective controls.
- Documented 18 benign scenarios as repeatable evidence — the audit-ready discipline HIPAA-regulated environments require.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

Blue Team SOC Monitoring Lab: Wazuh SIEM 2026

- Built a full Wazuh SIEM stack from scratch and validated 12 detection patterns against 242 simulated auth-style events with 100% precision after tuning, the same SIEM monitoring discipline a healthcare InfoSec Analyst applies daily.
- Reduced false-positive volume by 100% by tuning out 79 benign-only matches with documented justification.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

SOAR-lite: Incident Response Orchestrator 2026

- Built end-to-end IR automation — webhook ingestion, playbook routing, IP blocking, Slack notification, and incident write-up — modeling repeatable IR runbooks expected for healthcare environments.
- Eliminated four manual triage steps and reduced triage time by over 60% in lab testing.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

Phishing Analysis Lab 2026

- Triageed 5 real-world phishing samples end-to-end with header inspection, SPF/DKIM/DMARC validation, IOC extraction, and attacker infrastructure mapping — 100% accurate verdicts. Phishing is a top ePHI-targeting vector.
- Delivered structured triage reports with documented IOCs in audit-ready format.

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6) 2024

- Engineered RBAC and Azure AD SSO controls — direct identity-and-access security work transferable to clinical-adjacent system access management.
- Shipped enterprise-grade platform on deadline with zero critical security findings at delivery.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response 2019 - 2025

- Maintained 99.5% system uptime in a regulated, high-availability environment with rotating-shift coverage — direct experience applying continuous-monitoring discipline expected of healthcare security operations.
- Resolved 200+ anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% and supported audit readiness.
- Reduced mean time to recovery by an estimated 20% via cross-team coordination and post-incident reporting for technical and non-technical stakeholders.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress) Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
