

JACOB COOK

Cyber Risk Analyst | Cyber Defense & Incident Response Consulting | Network Security · Investigation · Client Communication

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Detection-focused security professional with hands-on Wazuh SIEM build, Sigma rule authoring, phishing investigation, and incident response automation. Strong analytical mindset and structured technical writing skills suited for case documentation, client briefings, and stakeholder advisory work in a consulting context. Six years of high-pressure 24/7 operations experience translates into the project-management discipline cyber defense engagements depend on. CompTIA-certified across four disciplines (Security+, CySA+, PenTest+, SecurityX); BS Computer Science; MS Cybersecurity in progress.

TECHNICAL SKILLS

Incident Response & Forensics: IR Lifecycle (triage → remediation), Investigation Techniques, IOC & Artifact Analysis, Timeline Reconstruction, Case Documentation, Network Security Fundamentals, Computer Security Audit Concepts

Detection & SIEM: Wazuh SIEM (build & admin), Sigma Rule Authoring, MITRE ATT&CK, Detection Tuning, Phishing Triage, Threat Hunting

Cloud & Identity: Azure AD / Entra ID, Okta, AWS labs, SSO / RBAC, Terraform, Linux / Windows Internals (familiar)

Project & Communication: Cross-Functional Coordination, Client-Style Briefings, Technical Writing, Mentor / Knowledge Transfer, Python · Bash · SQL · FastAPI · Git

TECHNICAL PROJECTS

SOAR-lite: Incident Response Orchestrator

2026

- Built end-to-end IR automation: webhook ingestion, playbook routing, IP blocking, Slack notification, and incident write-up — the kind of repeatable workflow consulting IR engagements run multiple cases on.
- Eliminated four manual triage steps and reduced triage time by over 60% in lab testing while preserving full case-documentation trail.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

Stryker / Intune Detection Pack: Detection-as-Code

2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK with documented findings, rationale, and benign-activity scenarios — the same structured case-finding format consulting engagements deliver to clients.
- Eliminated 100% of false positives in a 100-event simulation using documented baseline-lookup logic.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

Blue Team SOC Monitoring Lab: Wazuh SIEM

2026

- Built a Wazuh SIEM stack from scratch and validated 12 detection patterns against 242 simulated events with 100% precision after tuning, producing client-ready evidence-trail documentation.
- Reduced false-positive volume by 100% by tuning out 79 benign-only matches with documented justification.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

Phishing Analysis Lab

2026

- Triageed 5 real-world phishing samples end-to-end with header inspection, SPF/DKIM/DMARC validation, IOC extraction, and attacker infrastructure mapping — 100% accurate verdicts against ground truth.
- Delivered structured case write-ups with documented IOCs, confidence assessments, and escalation decisions in the same format consulting clients expect.

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6)

2024

- Briefed corporate sponsors on RBAC and Azure AD SSO security decisions during platform delivery — direct experience translating technical security work for non-technical executive audiences.
- Shipped on deadline under direct industry sponsor oversight with zero critical security findings at delivery.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response

2019 - 2025

- Coordinated cross-team response on rotating shifts — six years managing competing priorities and concurrent incident workloads under time pressure, the same project-management discipline consulting engagements demand.
- Resolved 200+ system anomalies through structured root cause analysis with tracked documentation that reduced repeat incidents by an estimated 30% — direct case-quality and follow-through experience.
- Reduced mean time to recovery by an estimated 20% via clear, timely status updates and post-incident reporting for stakeholders.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
