

JACOB COOK

Customer Focus Analyst (Unit 42 MDR) | Customer-Facing Cyber Communication | Incident Reporting · EDR/SIEM/SOAR/XDR · MITRE ATT&CK

Sacramento, CA · 916 709 1794 · jacobcookofficial@gmail.com
[linkedin.com/in/jcook-dev](https://www.linkedin.com/in/jcook-dev) · github.com/jacobdcook · jacobdcook.com

Security professional who can sit between MDR analysts and customers, translating complex incident detail into clear, actionable updates. Hands-on with EDR/SIEM/SOAR concepts via Wazuh build, Sigma rule authoring, SOAR-lite playbook automation, and structured incident write-ups. Six years operating in a 24/7 monitoring environment with cross-team escalation and stakeholder communication. CompTIA-certified across four disciplines (Security+, CySA+, PenTest+, SecurityX); BS Computer Science; MS Cybersecurity in progress.

TECHNICAL SKILLS

Customer Communication & Reporting: Incident Briefings, Executive & Technical Audience Summaries, Onboarding Support, Customer Communication Lifecycle, Issue Escalation & Advocacy, Cross-Functional Coordination

Detection & Tooling: SIEM (Wazuh), EDR Concepts, SOAR / Playbook Automation, XDR Concepts, Sigma Rule Authoring, MITRE ATT&CK, Microsoft Sentinel (familiar), KQL/SPL (familiar)

Cloud & Identity: Azure AD / Entra ID, Okta, AWS labs, SSO / RBAC, Terraform

Development: Python, Bash, SQL, FastAPI, Git

TECHNICAL PROJECTS

SOAR-lite: Incident Response Orchestrator

2026

- Built end-to-end alert automation that converts raw detection events into Tier-2-ready, customer-readable incident write-ups with documented routing, escalation, and resolution — the exact handoff a Customer Focus Analyst delivers.
- Eliminated four manual triage steps and reduced triage time by over 60% in lab testing while preserving end-to-end communication trail.
- Verification: 10 passing pytest cases in repo (tests/test_orchestrator.py).

Stryker / Intune Detection Pack: Detection-as-Code

2026

- Authored 6 Sigma-format detection rules mapped to MITRE ATT&CK with detailed analyst-and-customer documentation: detection rationale, benign scenarios, escalation guidance — the kind of report a customer-facing analyst translates and presents.
- Documented 18 benign false-positive scenarios with clear rationale so customers and analysts share a common understanding of alert intent.
- Verification: 43 passing pytest cases in repo (tests/test_rules.py).

Blue Team SOC Monitoring Lab: Wazuh SIEM

2026

- Built a Wazuh SIEM stack from scratch and validated 12 detection patterns against 242 simulated events with 100% precision after tuning — direct hands-on with EDR/SIEM concepts customers ask about.
- Documented every detection-tuning decision with clear rationale to support transparent customer communication on alert behavior.
- Verification: 19 passing pytest cases in repo (tests/test_detection_accuracy.py).

Phishing Analysis Lab

2026

- Triaged 5 real-world phishing samples end-to-end and produced structured incident summaries written for both technical analysts and non-technical stakeholders — 100% accurate verdicts.
- Translated IOCs and attacker infrastructure mapping into plain-language risk explanations.

G3-GPT: Industry-Sponsored Enterprise AI Platform (Team of 6)

2024

- Briefed corporate stakeholders directly on RBAC and Azure AD SSO security decisions during platform delivery — direct experience translating technical security work for non-technical executive audiences.
- Shipped on deadline under direct industry sponsor oversight with zero critical security findings at delivery.

PROFESSIONAL EXPERIENCE

Target Distribution Center | Operations Engineer: Systems Monitoring & Incident Response

2019 - 2025

- Coordinated cross-team incident response and stakeholder communication during outages — six years of high-pressure, customer-equivalent communication on rotating shifts.
- Resolved 200+ system anomalies with tracked documentation that reduced repeat incidents by an estimated 30% — the same case-summary discipline customer briefings depend on.
- Reduced mean time to recovery by an estimated 20% via clear, timely status updates and post-incident reporting.

EDUCATION & CERTIFICATIONS

WGU | MS, Cybersecurity (In Progress)

Expected Oct 2026 · GPA 3.50

CSUS | BS, Computer Science

Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSIE (stackable)
