linkedin.com/in/jcook-dev · github.com/jacobdcook · jacobdcook.com

Enterprise service desk analyst with a BS in Computer Science and an MS in Cybersecurity. Building personal software projects in Python APIs, security automation, and identity workflows, with current PostgreSQL lab work. Seeking backend, internal tools, and security automation opportunities.

TECHNICAL SKILLS

- Python · Bash · SQL
- FastAPI · REST APIs · Git
- TypeScript · React · Next.js
- PostgreSQL (current lab work)
- Security automation · Playbooks
- Wazuh · Sigma · MITRE ATT&CK
- Identity detection · Okta labs
- SSO / RBAC (project work)
- ServiceNow · Incident triage
- Windows · Linux · Networking
- Docker · Automated testing
- Documentation · Troubleshooting

PROFESSIONAL EXPERIENCE

Williams-Sonoma, Inc. | Service Desk Analyst Jun 2026 – Present

- Support hardware, software, POS systems, and network issues across 600+ retail stores in a high-volume enterprise service desk environment.
- Triage incidents in ServiceNow, troubleshoot Windows and store devices, document resolutions, and escalate complex issues to cross-functional IT teams.

Target | Warehouse Operations, Engineering & Facilities Support Oct 2019 – Aug 2025

- Supported engineering and facilities teams with industrial-system monitoring, hardware diagnostics, and troubleshooting in a high-throughput distribution center.
- Helped investigate recurring equipment and integration failures, validate sensor-to-server reporting, and coordinate issue escalation and operational changes.

SELECTED SOFTWARE & SECURITY PROJECTS

SOC Triage & Identity Workflow Lab | Personal project 2026

- Assembled a Python/FastAPI and PostgreSQL lab for alert normalization, evidence enrichment, triage decisions, and approval-gated response workflows.
- Added synthetic retail identity scenarios covering onboarding and rehire, with an optional Keycloak/OIDC lab and a Svelte interface.
- Automated checks exercise 42 alert cases, 10 identity scenarios, and PostgreSQL backup/restore. Uses mock AI by default; live integrations and broader API authorization remain in progress.

G3-GPT | Industry-sponsored CS capstone, team of six 2024

- Contributed to a document-retrieval application with Azure AD single sign-on and role-based access controls as part of a six-person student team.
- Worked with an industry sponsor on application requirements and access to corporate documents.

SOAR-lite | Python Incident Response Orchestrator 2026

- Built a FastAPI workflow for alert intake, event-based playbook routing, IOC enrichment, notifications, and incident documentation.
- Used automated tests to exercise application behavior and documented the lab's triage and response workflow.

Detection-as-Code & Wazuh Labs | Personal projects 2026

- Developed Sigma-format rules for MDM abuse, with MITRE ATT&CK mappings, admin-baseline enrichment, and documented benign scenarios.
- Configured a Wazuh SIEM lab, simulated authentication events, and tested detection patterns and false-positive tuning against synthetic data.

EDUCATION & CERTIFICATIONS

Western Governors University | MS, Cybersecurity and Information Assurance 2026

Sacramento State | BS, Computer Science Jan 2025 · GPA 3.50

CompTIA: Security+ · CySA+ · PenTest+ · SecurityX · CSAP · CSIE
